This trial is to use the combining marks and characters from Devanagari, DevanagariExtended and VedicExtensions unicode blocks with text in other Indic scripts, eg. Gujarati, Tamil, etc.

"The Devanagari Extended block, as well as the Vedic Extensions block and the Devanagari block, include characters that are used to indicate tone in Vedic Sanskrit. "
"This block of characters is used chiefly for Vedic Sanskrit, although many of the characters are generic and can be used by other Indic scripts. "
